Collaboration Between Schletter Solar Mounting Systems and S-5 Clamps Expands Installer Options

Tucson, AZ — [Schletter](#), a leading worldwide designer and manufacturer of solar photovoltaic (PV) mounting systems and S-5!, a manufacturer of attachment solutions for the metal roofing industry, have announced their collaboration resulting in product functionality between Schletter solar mounting rails and S-5! Clamps.

The Schletter Klick-Top™ connector can be combined with the S-5 clamp. This combination of the two products now enables the use of a Schletter system on a wider variety of sheet metal roofs.

“We view our working with S-5! as increasing the options available to our customers,” explained Sven Kuenzel, Schletter VP of Sales and Marketing. “Even though Schletter offers sheet metal clamps, we know that S-5! is a respected name in the U.S. and when combined with our own product offering, greatly increases the attachment selections for installers.”

About Schletter Inc.

Schletter has designed, developed and manufactured solar racking projects in the U.S. since 2008 while backed with more than 18 years of solar racking experience from Schletter GmbH. Since opening its United States facility in Tucson, Arizona Schletter Inc has manufactured more than 160 MW of installed PV mounting systems. Schletter Inc offers products for roof mount and ground mount systems for residential, commercial, and utility scale photovoltaic systems. Schletter Inc is an independent subsidiary of Schletter GmbH. For more information about Schletter Inc, visit www.schletter.us or, for more information about Schletter GmbH, please visit www.schletter.de.

S-5! is a registered trademark of [S-5! Corporation](#).
