

FS Stands "For Speed" and the System?
Well...that Stands Forever.

The FS System™

The FS System has a proven worldwide product and installation history, with over 4 GW of ground mount systems installed throughout the world—over 300 MW in 2011 alone—with many FS installations ranking among the largest globally.

FS System offers a culmination of experience and the highest level of in-house pre-fabrication to date. Ease-of-installation is accomplished through the use of the GAYK™ hydraulic ram. The result is an attractive system installed quickly, efficiently and with the durability to last.

Features and Benefits:

- High level of pre-fabricated parts
- Quick mounting time (watch this [video](#) of an actual installation)
- Easily accessible for ground and system maintenance
- Included certificated engineering by professional engineer licensed in the location of the project
- Soil and pull out testing

Support Materials:

- FS System Product Brochure
- Ground Mount Systems Overview
- GAYK Hydraulic Ram
