Solar Mounting System Product Enhancements Continue at Schletter

Schletter announces new features and ETL Listing for its AluGrid™ solar mounting system for flat roof applications

April 9, 2014 — Shelby, North Carolina — Schletter© announces product optimization enhancements to its AluGrid system, as well as the addition of ETL Listing. Now conforming to ANSI/UL Standard 1703 and UL Subject 2703 with 100% IBC code compliance to either ASCE 7-05 or ASCE 7-10, the AluGrid brings together high quality design standards and competitive pricing.

Additional enhancements to the latest AluGrid generation include a new module clamp, accommodating modules from 30 to 51 mm in thickness; a convenient new bonding jumper for interconnection between rows; and the AluGrid+, which offers the inclusion of a bottom rail, increasing options for module clamping locations.

“Product safety and reliability continue to drive Schletter’s product development team as well as continually reducing installation time in order to save our customers time and money,” says Ryan Kelly, Vice President of Sales for Schletter Inc. Mr. Kelly goes on to say that, “Once properly ballasted, this product offers a secure installation while being roof friendly. We believe the latest changes will be well received by our customers.”

The ETL Listed AluGrid is now available for flat roof projects in every state. For more information, including a no-obligation quote, contact the company or visit www.schletter.us.

About Schletter

Schletter (www.schletter.us) has designed, developed, and manufactured solar mounting products in the U.S. since 2008, while backed with more than 20-years of solar mounting experience from Schletter GmbH. Since opening its United States facility in Tucson, Arizona Schletter Inc. has manufactured more than 1 GW of installed PV mounting systems. Schletter Inc. offers products for roof mount and ground mount systems for residential, commercial, and utility scale photovoltaic systems. Schletter Inc. is an independent subsidiary of Schletter GmbH, which operates subsidiaries in eleven countries with more than 1,500 employees worldwide.
